

SUSTAINABILITY REPORT 2023

Aurajoki Oy, founded in 1967, is Finland's leading company in its field, specializing in metal surface treatment services and the manufacture of infrastructure steel structures.

We offer a wide range of economically efficient industrial services, from the production process to design, finishing and customer delivery.

As a flexible operator, we adapt to your needs, whether it's the entire supply chain or just a single service.

BUSINESS AREAS:

- Hot-Dip Galvanizing
- Electrolytic Coatings
- Steel Structures

VALUE PROPOSITION:

Sustainable Partner

VISION:

Leading company in our field in North Europe

VALUES:

Reliable & Renewing

MISSION:

We provide sustainable solutions to our customers

In Finnish private ownership (Aurajoki Oy owns 50% of the Latvian steel structure workshop Auratec SIA).

We Invest in Responsible Operations and Sustainable Development

Aurajoki Oy is your responsible partner that offers sustainable solutions. We have clarified our carbon footprint and achieved full carbon neutrality from 2024. We are also investing in Europe's most environmentally friendly hot-dip galvanizing plant in Lieto, which will open in July 2024 and utilize the latest technology in the field.

High-quality, ethically produced and environmentally friendly surface treatment is an investment in a better and more sustainable future - both for You and your customer.

TAX FOOTPRINT:

Environmental and excise taxes

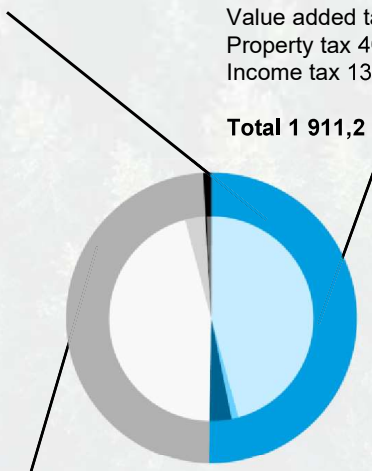

Electricity tax 7,3 t€
Excise tax 27,1 t€

Total 34,4 t€ (54,4 t€)

Value added, real estate and income tax

Value added tax 1 740,3 t€
Property tax 40,5 t€
Income tax 130,4 t€

Total 1 911,2 t€ (2 949 t€)

Personnel-related tax-related payments and withholding taxes

Withholding tax 1 736,1 t€
Health insurance premium 121,0 t€

Total 1 857,1 t€ (1 712 t€)

OUR OPERATIONS ARE BASED ON RESPONSIBILITY IN ALL AREAS:

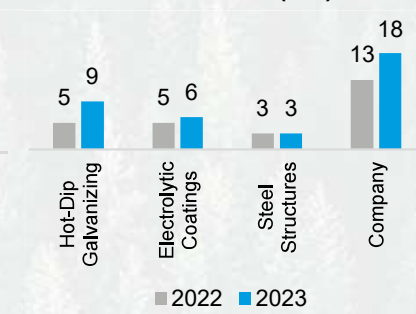

Safety and Quality

Absences due to illness (avg. %)

Accidents (LTI)

Accident Frequency (LTIF)

2022	58
2023	86
/ 1 000 000 working hours	

Environment

Electricity Consumption (MWh)

Hot-Dip Galvanizing	9 774 (12 745)	Electrolytic Coatings	4 537 (4 781)	Steel Structures	270 (267)	Company	14 581 (17 793)
---------------------	-------------------	-----------------------	------------------	------------------	--------------	---------	--------------------

Waste (tons) / Recycling Rate

Liquids	365 (690)	98 % (84 %)
Solid	262 (788)	98 % (84 %)
Metals	677 (129)	100 % (100 %)
Packaging Materials	38 (34)	100 % (100 %)

District Heat Consumption (MWh)

2022	5 517
2023	5 549

People and Competence

Gender Ratio (people)

Hot-Dip Galvanizing	43 (43)	Electrolytic Coatings	40 (39)	Steel Structures	44 (46)	Company	42 (43)
---------------------	------------	-----------------------	------------	------------------	------------	---------	------------

Average Age (years)

Category	M	W
Hot-Dip Galvanizing	91 (89)	8 (9)
Electrolytic Coatings	42 (41)	12 (18)
Steel Structures	25 (23)	5 (4)
Company	158 (153)	25 (31)

Employment Relationships

Total	183 (184)

Temporary	14 (14)

Ethics

Ethical, equal, people-oriented, transparent and corruption-free operations are also an important part of our responsible operations. We keep our customer promise and take care of the well-being of our customers, partners and staff as best we can.

OUR CARBON FOOTPRINT:

Carbon Footprint (t CO₂)

	Scope 1	Scope 2	Total
Hot-Dip Galvanizing	94 (144)	331 (716)	424 (860)
Electrolytic Coatings	62 (62)	246 (312)	307 (374)
Steel Structures	103 (73)	8 (8)	111 (81)
Company	258 (279)	585 (1 036)	843 (1 315)

Total CO₂ Emissions

CO₂ Emissions / Electricity Consumption by Business Area

Hot-Dip Galvanizing: per thousand galvanized kilograms	0,027 (0,046) t CO ₂ / tkg	0,63 (0,69) MWh / kg
Electrolytic Coatings: per thousand produced bars	0,005 (0,005) t CO ₂ / bar	0,07 (0,07) MWh / bar
Steel Structures: per thousand produced kilograms	0,072 (0,050) t CO ₂ / tkg	0,176 (0,163) MWh / kg

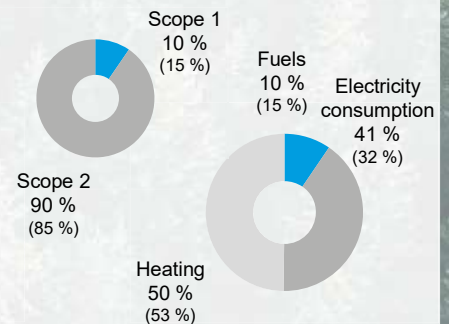

CO₂ Emissions / Aura

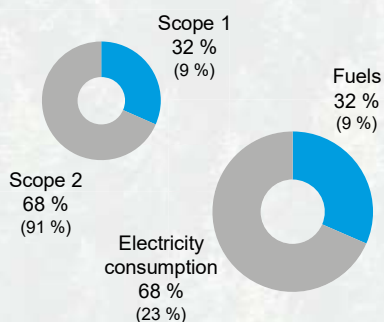

CO₂ Emissions / Lievestuore

CO₂ Emissions / Mikkeli

CO₂ Emissions / Pirkkala

CO₂ Emissions / Turku

CO₂ Emissions / Saarijärvi

The calculation has been performed in accordance with the international GHG protocol (Greenhouse Gas Protocol). The calculation considers the following emission sources from our value chain:

Scope 1 = The company's direct emissions
e.g. emissions from properties owned or managed by the company, energy production and vehicles

Scope 2 = Emissions from the production of purchased energy e.g. emissions caused by the production of electricity, heating and cooling purchased for the company's own use

We monitor our carbon footprint every year and develop our operations for a cleaner future.
